PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>When calculating desired sample size based on the estimated population size, whether using the Cochran formula or any other, the number obtained (in this case 384) is the minimum number of completed questionnaires to be collected. It is not the number of questionnaires to be distributed. If the author insists on using this formula, it will be necessary to distribute another 2-300 questionnaires in order to obtain the required sample size.</p> <p>There should be a comparison of demographic characteristics between the sample achieved and the overall population. The issue of possible non-response bias should be addressed. The conclusion should include the research limitations and suggestions for future research.</p>	
Minor REVISION comments		
Optional/General comments
