SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Manuscript contains many English errors including grammatical and typing errors. So, English of the entire manuscript should carefully be checked. In addition, format of all references should be consistent and appropriate for the requirement of the journal.</p> <p><i>S. aureus</i> should consistently be used throughout the manuscript instead of <i>Staphylococcus aureus</i>. This name should be written in italic.</p> <p>Some terms such as in Line 74, "The Institute of Standards", in Line 76 " ISIRI No. 6-6803" and in line 86 "ISIRI, No. 3-6806" needs further definition.</p> <p>Lines 141-142, statement of "To perform a disk diffusion agar test, the Muller Hinton Agar (Merk, Germany) was made according to CLSI instruction." is confusing. What was done according to CLSI instruction? Disk diffusion agar test or Muller Hinton Agar?</p> <p>First paragraph of Materials and Methods should be entitled as "isolation of bacteria".</p> <p>Lines 31-32 "The isolates which have the sea to see gene1" expression needs to be clarified.</p> <p>Lines 35-36, "Enterotoxin required to cause symptoms of food poisoning is very low and can cause symptoms such as abdominal cramping, nausea, vomiting, and sometimes diarrhea." This sentence should be re-written.</p> <p>Lines 150-151, "trimotroprim-sulfamethoxazole" is wrong, should be corrected as "Trimethoprim/sulfamethoxazole". Similarly, other errors such as Oxaziline in antibiotic names should be corrected.</p> <p>The value of "10^5-5×10^5" in Table 2, should be checked.</p> <p>In Figure 2, it might be better to use "prevalence of <i>Staphylococcus</i> strains in raw milk" instead of "Infection rate"</p> <p>Statement given in Lines 254-257 is unclear. Which area has limited studies?</p>	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues
