

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Physical Science International Journal
Manuscript Number:	Ms_PSIJ_50051
Title of the Manuscript:	The Big Bang or the Conductivity of the Interstellar Space
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The comments are given as follow:</p> <ol style="list-style-type: none"> 1. The abstract is not written in ONE paragraph. Notice that writing the abstract in ONE paragraph is a normal task in any research paper. Does it hard to follow? 2. There are so many paragraphs in ONE or TWO sentences. Could the paper be written in an organized way? Usually, a paragraph must be at least 4 or 5 lines and do not too long until half pages. 3. It is suggested to use MathType to typeset the equations. The equation editor in Word does not give a nice appearance to the equation. Could the equations be presented in a new line rather than joining with the sentences? 4. About 90 percent of the references are from Wikipedia. The scientific paper shall not take Wikipedia as references. The references shall consist of research papers, textbooks, thesis, research reports and all related references regards to the research conducted.
