

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	South Asian Journal of Research in Microbiology
Manuscript Number:	Ms_SAJRM_46120
Title of the Manuscript:	Comparative Bioremediation Potential of Pseudomonas aeruginosa KX828570 and Bacillus megaterium KY085976 on oil spill dispersant polluted terrestrial soil
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The research described in this manuscript is significant and the revised manuscript is well-written. The research is an example of the practicable application of biodegradation technology to the clean-up of contamination caused by oil-spills. The described research is important globally and potentially extremely useful.</p> <p>The revised manuscript is ready and acceptable for publication.</p>
