

Editor's Comment:

After evaluation of the revised manuscript named "CHARACTERIZATION OF PEDANA PATIN JAMBAL WITH VARIOUS SALT CONCENTRATION AS ENVIRONMENT CONTROL ", it is clear that the author(s) has addressed the comments of the Reviewers in appropriate way.

Besides several typing errors, the manuscript clearly presents the main idea of this work as well as its importance in this area of research.

Therefore, I recommend it for publishing in your Journal. However, before publishing the article should be checked for aforementioned typing errors.
