

Editor's Comment:

The manuscript entitled Incidence of Microorganisms on Environmental Surfaces in Some Secondary Schools in Birnin Kebbi, Kebbi State, Nigeria is relevant, unpublished and dissemination of the results of this study will certainly contribute to the scientific community. However, some corrections should be made to improve the quality of the manuscript submitted.

Some corrections suggested by the reviewers were not made:

- References in the text are NOT to the style of the journal. The references should be in brackets [2].
- References at end of article are NOT to the style of the journal. References at end should be in numerical order according to their order in the text.
- Methods and introduction are too long.
