**SDI Review Form 1.6**

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>Line 26: the study about snacks, are these snacks meal replacers? If not, is the comparison appropriate?</li> <li>Lines 30-32: As you discuss healthy vs. unhealthy foods it would be appropriate to list examples. In my nutrition world we stay away from labelling foods as "unhealthy" but consider them as poorer choices. This prevents food aversions.</li> <li>Line 43: "immunity to disease" can infer biological properties. I believe you are referring to the NCDs you refer to later. I would recommend rewording this thought.</li> <li>Line 48-54 paragraph: non-communicable disease could mean many things. You explain them in Line 162. Defining them here would clarify your meaning.</li> <li>You discuss the DDS in the results, but do not refer to it in the methods section. How this is calculated, or your source would be meaningful.</li> <li>Line 180-181: Is it fair to say people were observed to be overweight? This is a judgement statement. Did you take height and weight or ask for it in the survey and calculate their BMI?</li> <li>2.2 Data Analysis: You made comparisons with linear correlation and Chi Square, but have not shown the results of that data to medical history and only verbally with lifestyle sections. These results would be valuable to see.</li> </ul>	<p>Snacks here are not meal replacers but taken in between meals</p> <p>Ok. Included</p> <p>Ok</p> <p>Done</p> <p>Ok</p> <p>Sorry. Adjusted please</p> <p>Removed. That's for another work please</p>
<b>Minor</b> REVISION comments	<ul style="list-style-type: none"> <li>Grammar issues: line 25-more frequently than (normal?) weight; line 57- some frequently (eaten?) snacks</li> <li>Biscuits vs cookies: Your context leads me to think biscuits and cookies mean the same thing (British use of term, Figure 1). Then in line 189 you use the term cookie. I find this confusing (coming from the USA) Clarify please.</li> <li>Line 186: instead of just "pies", I recommend you say "meat pies". Again, in the USA we don't eat very many meat pies and pies to us are pastries. You will want to reach a broad audience.</li> <li>Line 188: I have never thought of "burgers" as pastries.</li> </ul>	<p>Adjusted</p> <p>In Nigeria, biscuits are hard snacks like cookies. I'm not referring here to the soft kind of 'biscuits' I got at a fastfood shop when I visited the US.</p> <p>Ok. Noted but in here, we also have people who eat a variety of pies such as fish, chicken &amp; bean pies that was why I used the general term 'pies' to cover them all please.</p>
<b>Optional/General</b> comments	You thoroughness on your percentages and snack patterns was well done.	Thank you

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
