PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	A case report will not be a good ground to JUSTIFY the hypothesis of the author as a growing menace. I implore author to readjust the topic to CASE REPORTS Authors details to follow the topic The abstract need to be re-written. The case study cited and the discussion should not be with the abstract rather should be in the body of the work. To be included in the abstract should be: How many case studies were observed to warrant increase in the menace, method of gathering the informations of the patients studied, statistical data collection about the addiction i.e is it on increase among which of the sickle cell gender, age etc, and likely common clinical features and laboratory findings. Body should be titled as INTRODUCTION and the sub-headings well numbered	The topic has been adjusted accordingly. The abstract has also been rewritten The heading and sub-headings have been correctly written. Thank you for the review
