PART 1: Review Comments

	Reviewer's comment	**Author's comment** *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	**The result should be analyse using descriptive statistics not t-Test of ANOVA, because :-** **ANOVA- compares the mean between the groups to determine whether any of those means are statistically significantly different from each other. While t-Test compare if there is a significant variation between means of groups.** **If you monitored the parameters for dry and wet seasons, then you use t-Test.**	
Minor REVISION comments	See text and affect the corrections in the highlighted areas.	
Optional/General comments	**Introduction** ➢ Background information provided is relevant, ➢ sources of information were adequately acknowledged and ➢ objectives provided is relevant **methodology** The source of data generation is relevant and the techniques adopted is recent and appropriate
