

SDI Review Form 1.6

Journal Name:	International Journal of Medical and Pharmaceutical Case Reports
Manuscript Number:	Ms_IJMPCR_50866
Title of the Manuscript:	DETECTION OF METASTATIC BREAST CARCINOMA CELLS IN BONE MARROW BY FLOW CYTOMETRY
Type of the Article	Case study

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	The paper is of interest and enough well written. The staining of bone marrow should be improved and inside the images presented, the authors should indicate what is visible. The last figure can be improved. The Authors should indicate if this figure is referred to the case described in the paper or it is an example. In the conclusion the Authors should reinforce the relevance of cytofluorimetry in identifying correctly the disease in this specific case report. Indeed, it is obvious that cytofluorimetry is an important tool in diagnosis of malignancies (in particular in hematological malignancies).	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
