PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>Giant land snail will be advised to be used in the title for clarification purpose</p> <p>Oluyemi and Robert (2000) was not listed among reference list I think the convectional should be conventional Use of etc may not be appropriate. Kehinde 2009 was not listed in reference list And there are two Kehinde 2019 in list of reference and only one is cited. Please correct it Please start each name on reference list with Capital letter such as kehinde 2009 Bawa et al 2012 is not listed in reference list. Omole 2002 not listed Please be careful with the use of etc. It is not scientific enough. Ejidike amd Oyekunle and not amd The most common snail species in Nigeria is Archachatina <i>marginata</i>, it is the biggest snail species in Nigeria and its adoption in this trial will further promote snail rearing in captivity. The above statement seems to be like a fact but it needs to be referenced. Please get a source for the information. I think this should be AOAC not A.O.A.C (2005) Sam <i>et al.</i>, (2019) This is not in the list of reference. There are few typographical errors in the manuscript, please read through and correct such as CASSAV instead of CASSAVA On reference section: Please start each journal with capital letter such as Nigeria Journal of Animal Science not Nigeria Journal of animal science Please ensure uniformity in the reference style either use vol in all or not. (Please check through and ensure uniformity) Aina and oluwasanmi is not listed in reference list. Nutrition is to have previously adopted different processing methods to improve fiber utilization (Please rephrase) Akintola et al 2019 not listed in reference list tewe 1997 not in the reference list I noticed there is no recommendation in this study, I will suggest that more research should be conducted on how to improve snail weight gain within a shorter time as its growth is a major concern to snail production profitability.</p>	
Minor REVISION comments	<p>Please read through the manuscript as there are information that needs to be written correctly</p>	
Optional/General comments	<p>Please align your discussion with your objectives. The study is educative and important for snail production</p>
